

# From User Requirements to Strategic Roadmaps

## ChatGPT-Powered Workshop

**Ana Roje Ivančić, Ognjen Bajić**

Professional Scrum Trainers, DevOps Consultants

Microsoft MVPs for Developer Technologies

# Agenda

- ChatGPT (Gen AI)
- How ChatGPT Can Boost the Product Owner's Work?
  - Product Backlog Management
  - Product Backlog Refinement
  - Defining Tests and Test Data
  - Roadmaps and Product Discovery
- Conclusion

# Trainers: Ognjen Bajić and Ana Roje Ivančić

In Software Development since 1996/1999

Helping teams improve DevOps practices since 2005

Worked as Dev, PM, Test, RM, SM, PO...

Microsoft MVP for Developer Technologies (ALM/DevOps)  
since 2006/2016

Professional Scrum Trainer (PST) for Scrum.org since 2018

Ana Roje Ivančić, [arojeivancic@agilist.hr](mailto:arojeivancic@agilist.hr)

Ognjen Bajić, [obajic@agilist.hr](mailto:obajic@agilist.hr)

Zagreb, Croatia

# ChatGPT (Gen AI)

# Why ChatGPT?

Tremendously enhances your expertise and skills.

But remember,  
**you are in charge,**  
and ChatGPT is (just)  
a powerful tool at your service.

 Available 24/7 Infinitely patient More knowledgeable than any human Extremely fast Enjoys repetitive work

# What's In It For Me As a Product Owner?

**Partner** on Product Ownership (or any subject)  
by applying an iterative and incremental approach

Enhanced Domain-  
Specific Learning

Requirement  
Ideation & Creation

Requirement  
Decomposition &  
Refinement

Requirement  
Analysis &  
Validation

Test Case Design  
& Test Data  
Preparation

Assistance in  
Stakeholder  
Communication

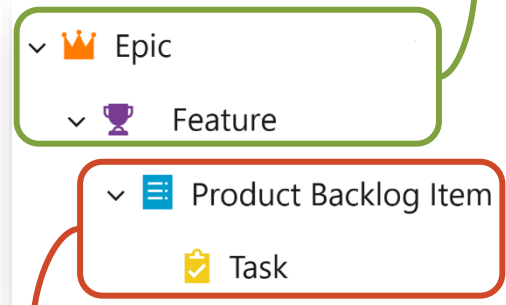

# Product Backlog Management

# Hierarchical Product Backlog Example

Business  
What? Why?

Development  
How?

Fabrikam Fiber Team

Backlog Analytics + New Work Item View as Board Column Options

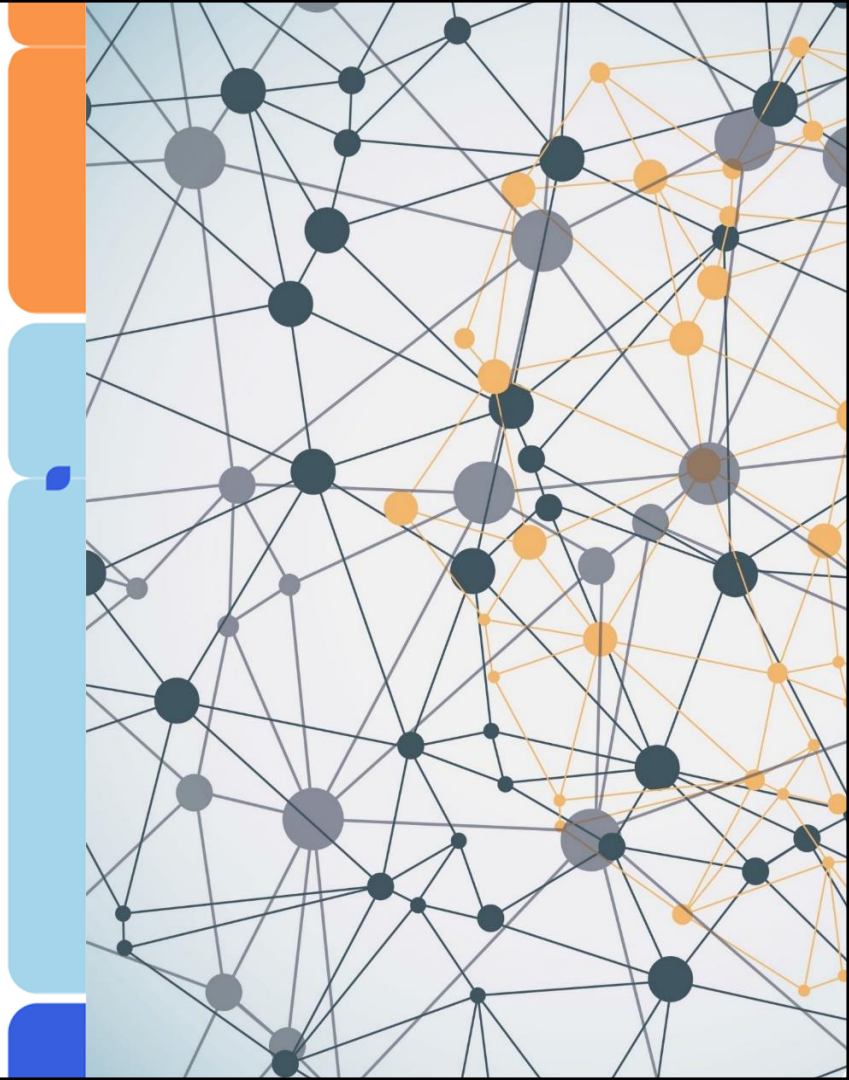

Order	Title	State	Progress by all Work Items
+ 1	▼  Improve User Experience	● Active	71%
2	▼  Integrate client application with popular email clients	● Active	50%
3	Implement a factory which abstracts the email client	● Active	
4	As a user, I can select a number of support cases and use cases	● Closed	
5	▼  Emoticon feedback enabled in client application	● Closed	100%
6	As a user, I can select an emoticon and add a short description	● Closed	
7	Add animated emoticons	● Closed	
8	Integrate client app with IM clients	● Closed	
9	Shared Personalization and state	● New	
10	▼  Framework to port applications to all devices	● Active	88%
11	▼  Migrate legacy code to portable frameworks	● Closed	87%
12	Implement a factory that migrates legacy to portable frameworks	● Closed	100%
13	Develop framework architecture	● Closed	
14	Document framework architecture	● Closed	
15	▼  As a developer, I can analyze a code base to determine complian...	● Closed	75%
16	Simplify analysis tool	● Closed	
17	Deploy premium service for code analysis	● Closed	
18	Add auto-analysis checkbox to checkin sequence	● Active	
19	Add test suite for automation	● Closed	

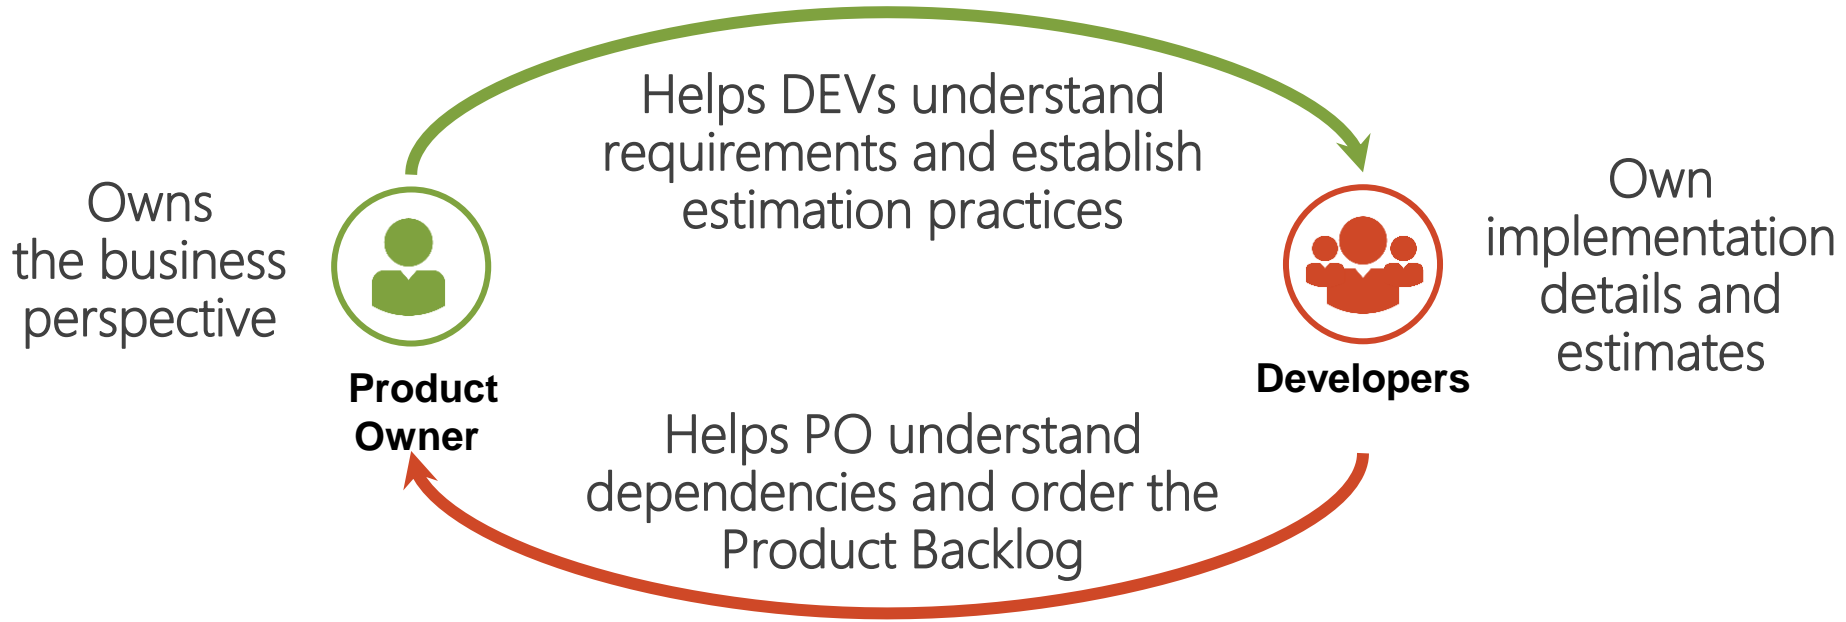

# Product Backlog Management

# Product Backlog Refinement

# Refining the Product Backlog Through Collaboration

# Example Definition of Ready (DoR) for PBIs

Criterion	Property	Explanation
Clearly described	<b>Title and Description</b>	The team should have a shared understanding of what the item entails, its business value, and what is required to complete it.
Clearly Defined Acceptance Criteria	<b>Acceptance Criteria</b>	The item should have clearly defined criteria that determine when the item is completed.
Appropriately Sized	<b>Size</b>	The item should be small enough to allow for effective planning, execution, and delivery within the Sprint timeframe, without the risk of carryover.
Estimated by the Team	<b>Estimate</b>	The item has been estimated, and the team agrees that it is small enough to be completed within one sprint.
Technical Feasibility Assessed	<b>Linked child Tasks</b>	The technical aspects have been reviewed to ensure the story is feasible within the current system architecture.
Dependencies Resolved	<b>Linked Items</b>	Any dependencies on other stories, external systems, or team members are identified and resolved.
No Blocking Issues	<b>Linked blocking Issues</b>	There are no known blockers that would prevent work from starting on the user story.
Mockups/Design Provided	<b>Mockup/Design</b>	If the item requires UI changes, the necessary mockups or design specifications are ready and available.
Testable	<b>Test Cases</b>	The item should be framed in a way that allows for testing to verify that it meets its acceptance criteria.
Prioritized		The item has been prioritized within the backlog and is aligned with the product roadmap.

# Splitting PBIs During Refinement is Essential

- Splitting or Slicing=Decomposing into smaller units of work
  - Enables rapid customer feedback
  - Facilitates (re)planning
  - Use different patterns

Acceptance Criteria

Workflow steps  
(e.g., basic  
workflow, enhanced  
workflow)

Business Rules  
Variations  
(e.g., one rule per  
PBI )

Interface Variations  
(e.g., devices)

Operations  
(e.g., CRUD)

Variations in Data  
(e.g., languages)

Performance  
Variations  
(e.g., first slow, then  
enhanced)

# Roadmaps and Product Discovery

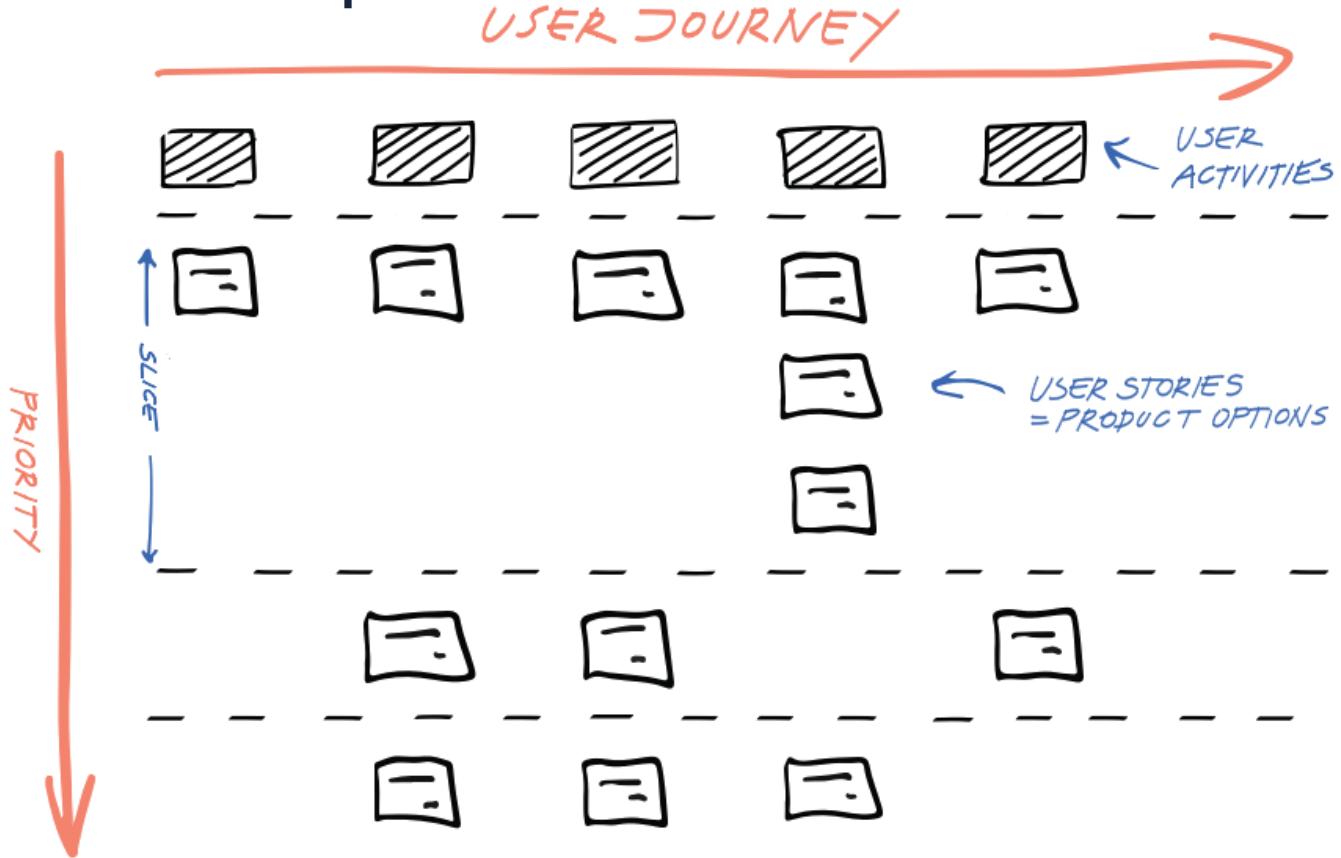

# Roadmaps Facilitate Conversations

- Visualize your high-level plan that defines a goal, desired outcomes, and major milestones needed to reach it
  - Increase transparency and alignment
  - Link plans to strategy
- Expectation management and communication tools for stakeholders and customers
- Warning: Do not imply certainty with roadmaps!
  - They only provide a forecast of the product's development in the coming period based on the current perspective

# User Story Mapping

## Feature Oriented Roadmap Format

# Goal Oriented Roadmap

 <b>DATE</b> The release date or timeframe	1 <sup>st</sup> quarter	2 <sup>nd</sup> quarter	3 <sup>rd</sup> quarter	4 <sup>th</sup> quarter
 <b>NAME</b> The name of the new release	MVP	Version 2	Version 3	Version 4
 <b>GOAL</b> The benefit the product should offer.	<ul style="list-style-type: none"> <li>Acquire an initial user base</li> <li>Understand my eating habits</li> </ul>	<ul style="list-style-type: none"> <li>Grow the user base</li> <li>Improve my eating habits</li> </ul>	<ul style="list-style-type: none"> <li>Generate revenue: in-app purchases</li> <li>Get fitter</li> </ul>	<ul style="list-style-type: none"> <li>Retention</li> <li>Keep up the good work</li> </ul>
 <b>FEATURES</b> The high-level features necessary to meet the goal	<ul style="list-style-type: none"> <li>Healthy eating dashboard</li> <li>Integration with smart watches and fitness devices</li> </ul>	<ul style="list-style-type: none"> <li>Recipes and shopping lists</li> <li>Social media integration</li> </ul>	<ul style="list-style-type: none"> <li>Personalised advice (coach)</li> <li>Weight loss</li> <li>Integration with scales</li> </ul>	<ul style="list-style-type: none"> <li>Enhanced eating tracker</li> <li>Integration with smart food scales</li> </ul>
 <b>METRICS</b> The metrics to determine if the goal has been met	Be in the top 15 diabetes app six weeks after launch	Activations, engagement, NPS	Revenue from in-app purchases two weeks after release	Engagement, NPS, monthly recurring revenue
