

# AI-driven Agility: Practical Workshop with Agile Copilot

Jan Železný & Mane Gabrielian

# Meet your coaches

**Jan Železný**

Head of Agile & AI Transformation  
Services

**Mane Gabrielian**

Product Owner & Cognitive Analyst

# AGENDA

- **Why AI? Why now?**
- **Copilots & Self-organization**
- **Use Cases for Copilots**
- **Q&A**

# Why AI?

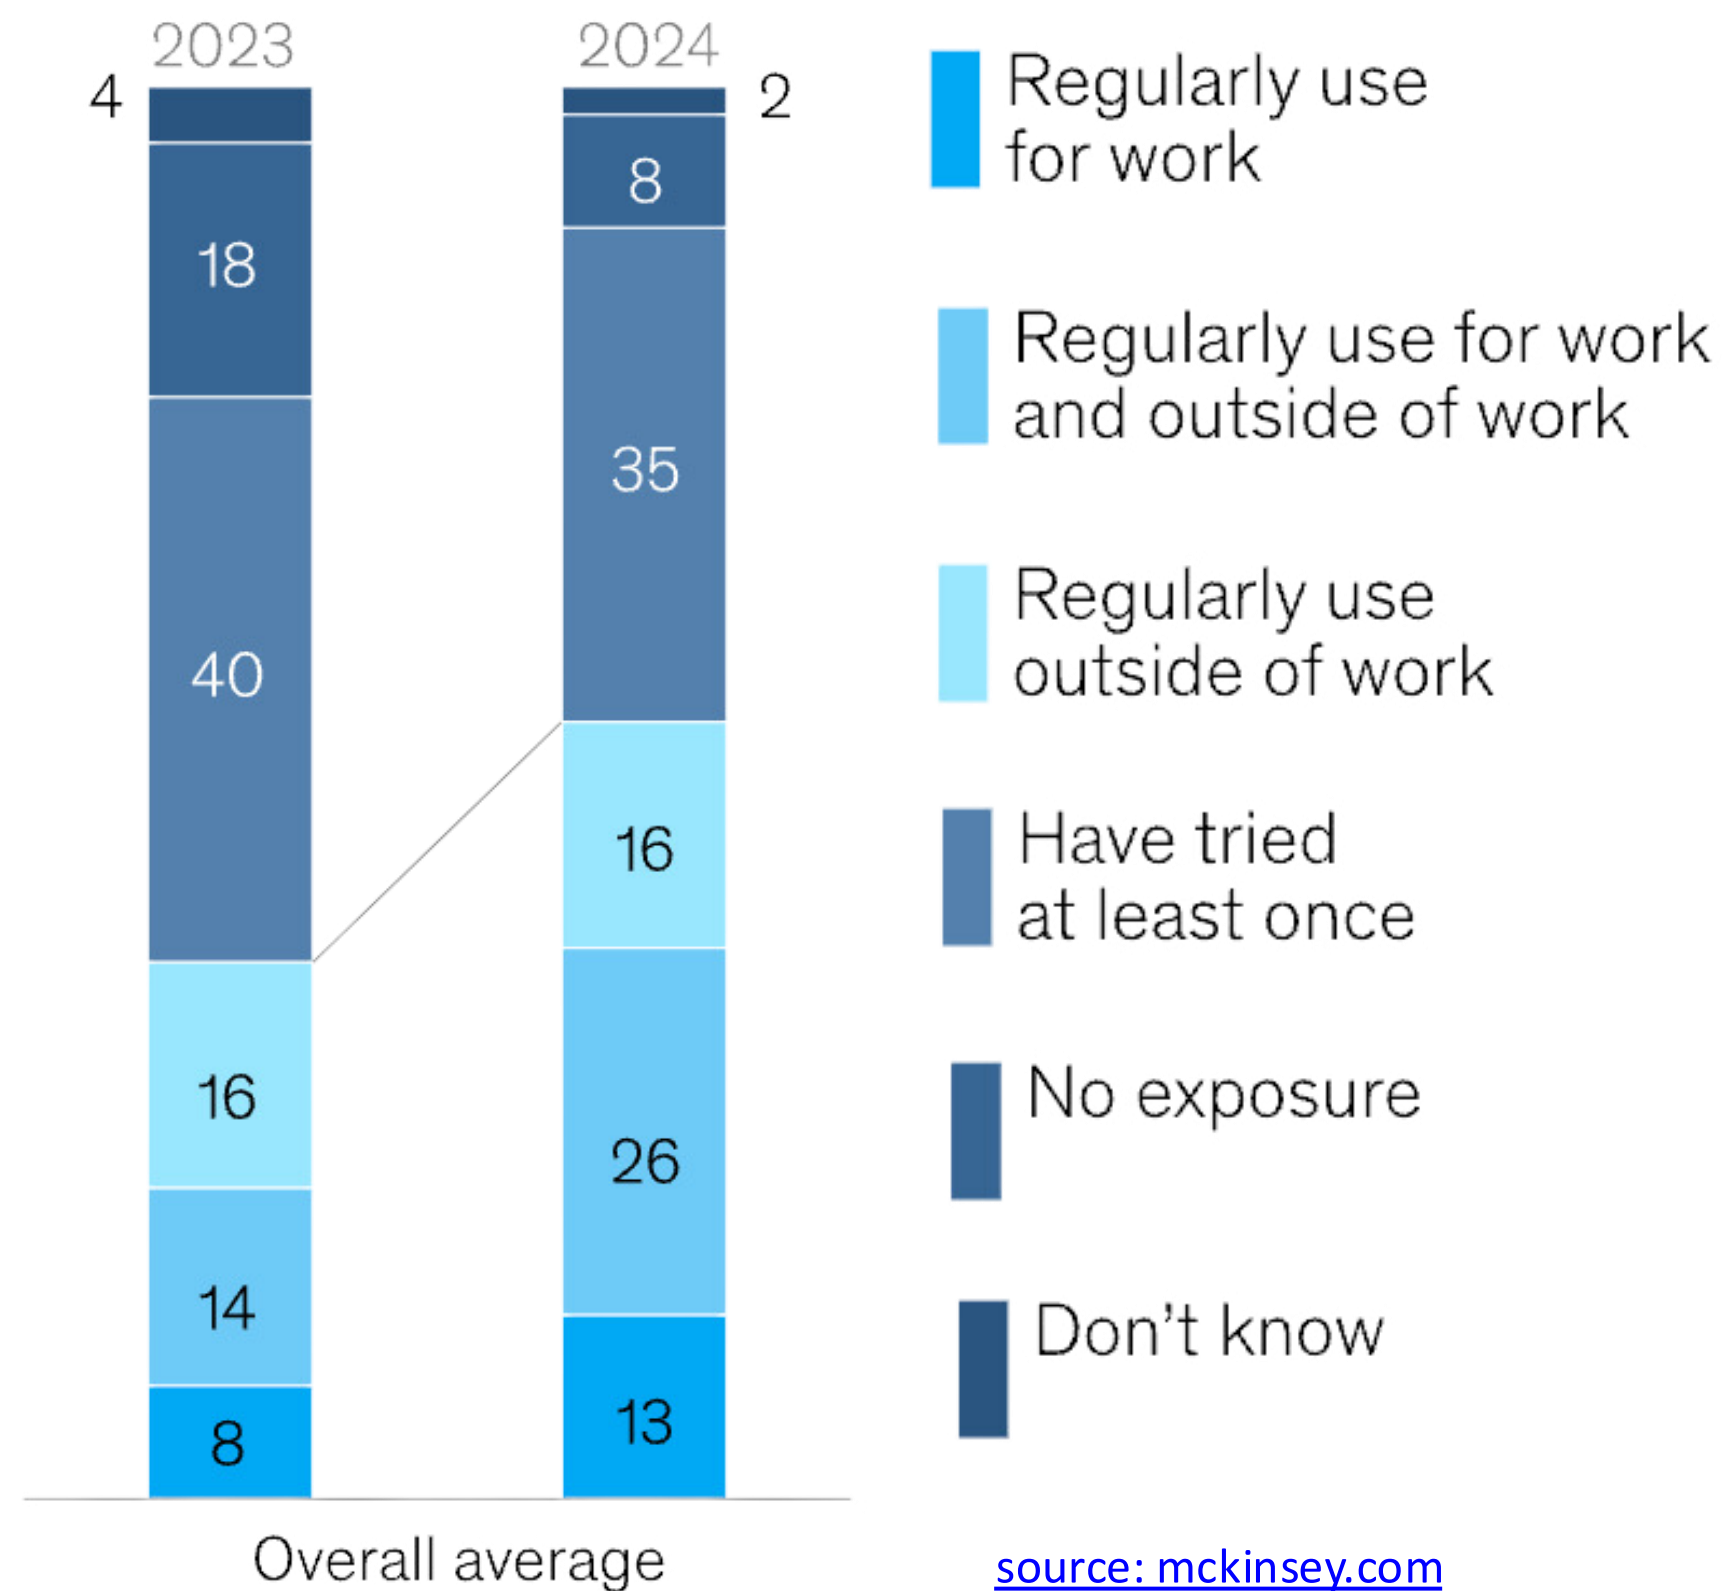

# Why now?

Revenue.AI

# What's your experience with AI tools?

How do you feel about AI integration into your work processes?

# Why AI? Why now?

McKinsey research estimates that gen AI could add to the economy between \$2.6 trillion and \$4.4 trillion annually while increasing the impact of all artificial intelligence by 15 to 40 percent

- Enhanced **Efficiency and Productivity**
- **Data-Driven** Insights for Better Decision-Making
- Improved **Collaboration and Communication**

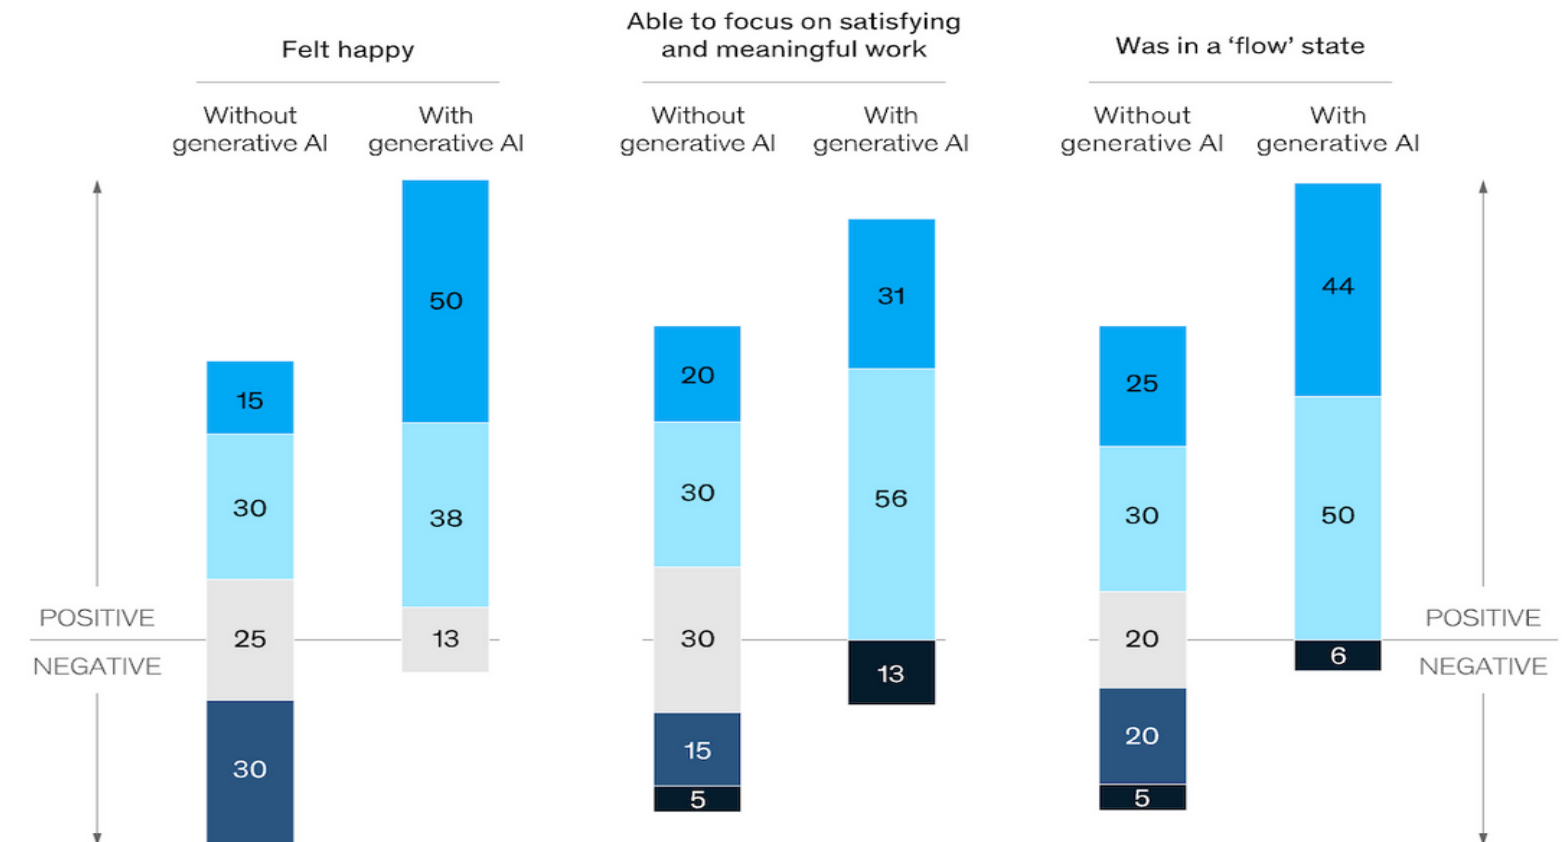

Organizations that have adopted AI in at least 1 business function, % of respondents

## Generative AI tools have potential to improve the developer experience.

Developer sentiments, % of respondents

Strongly agree Somewhat agree Neither agree nor disagree Somewhat disagree Strongly disagree

Note: Figures may not sum to 100%, because of rounding.

**Machine Learning**

**Neural Networks**

**Natural Language  
Processing**

**Expert Systems**

**Computer Vision**

**Reinforcement  
Learning**

**Intelligent Assistants &  
Copilots**

**Predictive Analytics**

**Deep Learning**

**Image Recognition**

# Why Copilots?

**Knowledge Retrieval**

**KPI Reporting  
Data Scanning**

# Use Cases for Copilots

Revenue.AI

Set proactive warnings and make **informed decision** with **data-driven** recommendations

Receive and leverage unified **data** from multiple sources directly into a unified platform

Enable Product Owners to **discover new opportunities** through public and enterprise knowledge bases

Automate key events and establish **unified way of working**

Empower teams with role-, region-, and department-specific insights

Provide **24/7 data availability** without career and operational issues

Build predictive models and **access valuable simulations**

Connect **strategic metrics** and **business goals** with teams' everyday life

**In 2024, is your organization able to?**

**How can you simplify with AI?**

# How does Agile Copilot help with Dependencies

## FROM

Dependencies are **not reliably recorded** and do not serve the organization. Instead, they are source of frustration, misalignment and negatively impact cooperation.

Directly impact (literally) everything, but mainly:

- Business results
- Prioritization
- Capacity planning

## TO

Teams and stakeholders **easily access dependency information** across teams and systems (ADO, JIRA).  
Quarterly planning practices get improved.

How to improve:

- Establish Information Engineering
- Connect systems through Copilot
- Set-up proactive and automated alerts

# How does Agile Copilot help with Onboarding

## FROM

Onboarding resources are **scattered** all over the organization and **contradict themselves**. The process **relies on specific individuals** to progress. Getting set up is a chore.

Directly impact:

- Business results
- Way of working consistency
- Retention and employer brand

## TO

People easily access **one-place-of-truth** with **simple prompts** and get relevant information regarding job & company as well as required expert know-how.

How to improve:

- Implement Onboarding Buddy track
- Prepare knowledge retrieval bases
- Inject workflow guidance to replies
- Gamify and smoothen experience

# How does Agile Copilot help with Business Goals, KPIs & Metrics

## FROM

Strategic Metrics and tactical metrics are **disconnected** – people don't interact with such and **cannot connect BAU to company results.**

Directly impact:

- Culture & organizing topic
- Prioritization
- Retention, hiring, employer brand

## TO

Strategic Metrics and business goals are **part of BAU** not only in theory, but in tools and processes.

How to improve:

- Knowledge retrieval with metrics
- Inject workflow guidance to replies
- Use fields in your system to connect tasks to strategic goals

# How to get there?

## Step 1

### Educate & Discovery

#### Educate with Quick Wins

- Provide free educational sessions on AI fundamentals.
- Showcase tangible examples to build team confidence and highlight immediate benefits.

#### Enter the Discovery Phase

- Explore AI tool capabilities and align them with business goals.
- Utilize our R-AI Cookbook for a structured approach.

2-4 hours of focused workshop supported by AI professionals

### Learn & Design

#### Learn and Design

- Conduct in-depth workshops to identify key AI use cases and success metrics.
- Customize AI integration strategies for optimal results.

8-10 hours Focused Training

## Step 2

### Build Your Own Copilot

- **Prioritize Implementation Areas:** Identify where AI can have the most impact, focusing on high-risk growth areas or teams burdened by manual tasks.
- **Effort and Automation Assessment:** Estimate task efforts, determine automation potential, and redeploy saved time to new value-generating tasks.
- **Assess Cost-Benefit:** Evaluate setup costs versus time saved by AI Copilot, using our free Automation ROI Calculation Kit for insights.

### Build AI & Data Strategy

- **Roadmap Development:** Create a detailed plan for AI implementation tailored to business needs.
- **Data Governance & KPIs:** Define robust data governance policies and establish KPIs to measure AI success.
- **Support & Education:** Access our free consultations and training resources to enhance AI understanding and proficiency.

## Step 3

# Grab your free Whitepaper!

Empower your AI-first Agile Transformation – Explore AI capabilities, adoption challenges, and a step-by-step roadmap to success.
